Why Recycle?

Old things can become something new!

Save materials

Recycling uses materials again, so we need fewer new resources.

Save energy

Making new things from recycled materials often uses less energy.

Make less garbage

Recycling keeps useful materials out of landfills.

Give it another life!

Used paper can become new paper. Metal cans can become new cans!

Be a recycling hero!

Reuse first. Recycle right. Ask an adult if you are unsure.

Recycling rules vary by community.
